

### **What are the advantages/disadvantages of being single?**

A wonderful asset of being single is independence. You can plan your time however you want and reschedule it at the last moment. The only opinion you should take into account before making a groundbreaking decision is the one of your own. Keeping away from relationships also lets you meet a variety of people of the opposite sex without the risk of causing an argument. Staying single may lead to a feeling of loneliness. While all your friends spend their evenings with their significant others, you are left on your own. Also, there is no one you can rely on in your most personal moments of failure or doubt. Another major drawback is the perspective of not having children. You might catch yourself thinking you wish you had someone to start a family with.
